

MULTISPRAY

Monchiero **2095** Harvester

The **2095 Harvester** is the ideal partner for medium sized holdings. Reduced height makes it easy to work in low hanging orchards with minimal damage to branches.

4WD plus Twin-lock Hydrostatic drive control system providing excellent traction on any terrain.

Rear fan located at the belt outlet and hydraulically speed-adjustable, separating the nuts from any lighter objects.

Speed adjustable lateral fan with electro-hydraulic control for blowing the nuts between the rows, turns off independantly when the harvesting of the line is over.

Wide section and low ground impact tyres allow for work on soft terrain.

Twin counter rotating and floating pick-up ensures a succesful harvest even in presence of grass and leaves.

Lateral brushes, thickly wired, that follow the ground and work effectively on uneven terrain. Brushes with steel disc and rubber blades (Optional) - Third lateral brush (Optional)

Adjustable pivoting wheels to follow uneven soil on gradients. Openable pick-up with double rotor facilitating servicing and cleaning operations.

Equalizer positioned at the sieve outlet making the fall of the nuts into the hopper easier and more uniform - (Optional). Bar belt conveying the material to the rear of the harvester and performing an initial clearance of debris from the nuts.
